Drugs to be tested for (tick as appropriate):

Extended Opiates:				
Amphetamines*	Cannabis	Oxycodone		Other:
Methamphetamines*	Opiates	Hydrocodone		
Cocaine	Phencyclidine	Hydromorphone		

*For Amphetamines and Methamphetamines, if one is requested, we will test for BOTH and charge for doing two tests

Studies have shown that head hair grows approximately 1cm per month. This growth rate varies slightly (estimated at +/- 0.2cm per month). Standard screening tests cover approximately 90-day periods (3cm); however a more detailed month by month analysis can be performed by testing individual 1cm sections enabling a historic record to be established as far back as the hair sample will allow.

Type of test required (tick as appropriate):

Standard Test - A length of hair can be analysed in order to determine the presence/absence of substances within a specific time period (i.e., 0-90 days, 90-180 days, 180-270 days, 270-360 days)	
Segmented Test - Lengths of hair can be segmented into sections and analysed in order to determine the presence/absence of substances within a specific time period (0-30 days, 30-60 days, 60-90 days)	

Required duration of drug testing (tick as appropriate):

1 month	6 months			Other
3 months	9 months			

Alcohol Abuse Testing

It is now possible to assess people who have been drinking heavily or using alcohol regularly (defined as at least 60 grams of alcohol per day) on a routine basis for a minimum of two to three weeks (CDT/LFT) and/or as far back as a hair sample will allow (HAT). The Complete Package is a combination of CDT/LFT/HAT including sample collection and expert witness statement to gain a full picture.

Test(s) required (tick as appropriate):

Carbohydrate Deficient Transferrin (CDT):		Liver Function Test (LFT):	
Hair Alcohol Test (HAT):		Complete Package:	

Expert Witness Statement Required (tick as appropriate):

Expert Witness Statement - Trimega Laboratories include within the testing charges a Certificate of Analysis and a summary with an extended report as statement. We can compose an Expert Witness Statement for court purposes as and when it is required that includes the clarification of the diagnostic findings. This is charged at an extra cost and is available for both Drug and Alcohol Testing		
--	--	--

Sample Collection (tick as appropriate):

Sample Collection - Trimega Laboratories provide a network of nurses who may attend your office or your client's home to collect the sample. The cost of collection is charged at an extra cost.
