TRIMEGA LABORATORIES LIMITED
("TRIMEGA LABORATORIES" OR "THE COMPANY")

TRIMEGA LABORATORIES WINS NHS CONTRACT

Trimega Laboratories has been appointed to the new NHS Supply Chain Drugs of Abuse National Framework Agreement Contract.

The appointment means Trimega Laboratories can now provide point of care testing products for drugs of abuse to NHS users throughout England and Wales. Typical instances where the products will be used include:

- Prioritising patients for alcohol and drug treatment programmes
- Proving abstinence during drug treatment and rehabilitation
- Proving abstinence prior to organ transplants

The NHS substance abuse testing market is currently estimated to be worth £10 million but this figure is likely to increase significantly as the widely-predicted 'time-bomb' of alcohol-related health problems explodes in the UK. The London-based company's contract appointment coincides with having expanded its range of products to include, not just the most accurate hair alcohol test in the world, but a revolutionary 80 hour urine alcohol test and a saliva-based 'Drugalyzer' product that is being piloted in various locations internationally.

Avi Lasarow, managing director of Trimega Laboratories, commented: "This is recognition that Trimega has met the stringent standards required by the NHS Supply Chain contracting procedure. We have award-winning products and lead the substance abuse market in terms of customer service and so are very pleased to be able to now demonstrate to the NHS in real terms what we have to offer.

The NHS Supply Chain appointment comes a month after The Nursing & Midwifery Council (NMC) renewed its contract with Trimega Laboratories to provide drug and alcohol misuse testing services. The NMC, a body set up by Parliament to regulate the UK's 682,000 nurses and midwives, uses such testing in cases where drug or alcohol dependency is thought to be affecting impairment of fitness to practice.

About Trimega Laboratories

Established in London in 2005, Trimega Laboratories (www.trimegalabs.com) has developed a range of innovative techniques for testing substances of abuse. Its core business is laboratory-based analysis of hair samples that provides accurate historical records of any alcohol or drugs dependency over a one to 12 month period. This method is certified to ISO 9001:2000 by Lloyd's Register Quality Assurance, a UKAS-accredited certification body, and is used in the UK by Family Law specialists, social services, regulatory bodies, professions such as nurses and pilots, as well as being ordered by the Courts directly. Other services offered by Trimega Laboratories include: Roadside Drugalyzer Testing for law enforcement, Hair Steroid Testing for athletes, and most recently, Hair Benzodiazepines

Testing. In 2008, Trimega Laboratories won the title of Best Use of Technology in the Barclays-sponsored Startups Awards, was a regional winner in the HSBC Start-up Stars and a finalist in the National Business Awards. Trimega Laboratories was also a finalist in the 2009 Fast Growth Business Awards.
